

2008 SCILAB Contest

Dec. 2007 – Oct. 2008 Liuzhou, GuangXi

Sponsor

LIAMA, China
INRIA/Scilab Consortium - France
Ecole Centrale de Pékin, China
People's Government of Liuzhou Municipality
Guangxi University of Technology

Co-sponsored by

French Embassy in China
Institute of Automation, Chinese Academy of Sciences (CASIA)
OW2 Consortium
Chinese Association for Artificial Intelligence
Intelligent Automation Committee
Chinese Association of Automation
Robot Competitions Working Committee, Chinese Association of Automation
Guangxi Association of Automation

In Cooperation with

France Telecom, R & D Beijing
Thomson Broad Hand R & D Beijing
Bull Information Systems Beijing
Ecole Centrale de Pékin, China
Communication Bureau of Liuzhou Government
Liuzhou Education Bureau
Liuzhou Science and Technology Committee
Liuzhou Bureau of the Information Industry
Liuzhou Administration of Radio Film and Television
Liuzhou Association of Science and Technology
Liuzhou Daily
Liuzhou Doctors Association

Competition Purposes

The competition is sponsored for Chinese students and technicians to improve the ability to study and manage SCILAB, and it can also provide an opportunity and a stage to express your own talent in computer programming. What's more, it is a competition that exhibits the demeanor of college students in science and technology and enhance the intercommunication and cooperation of own college student with one another. The competition advocates the time spirit of "freedom, share and creation". This competition campaign is conducted by the technicians from France and China, and the main target of the competition is to improve the communication and cooperation between two countries.

Contest Instruction

(1) Participants can select any subject they are interested in. The software should include the demonstration of the creation, examples, and online help files. The language online help files may be English.
(2) Demonstration of the procedure should program by Scilab, but you may also include other languages, such as C, Fortran, C++, Java.
(3) Toolboxes should be available in Scilab 4.1.2 environment or higher, and you can choose any version of binary system support platform for your toolbox.
